

SAFESHIELD™

ANTIMICROBIAL TECHNOLOGY BY APPVION

SafeShield technology prevents the replication of DNA and new cell formation. Independent lab tests demonstrate up to 99.99% reduction in non-pathogenic bacteria on the paper's surface even after printing and post processing.

Features:

- Prevents the replication of DNA and new cell formation
- Maintains paper properties and appearance even after printing and post processing
- Formulated with components that have gone through the United States Environmental Protection Agency (EPA) review and registration processes
- Available on a wide variety of Appvion products
- Made in the USA
- Backed by 100% satisfaction guaranteed

Industries:

- Healthcare
- Food Service
- Education
- Entertainment
- Transportation
- Government Sectors
- Office Settings
- And More!
